

NuVision Technologies Inc.

Provides many products and services to local and national chain vendors. You might not see our logo, but you definitely see our work. NVT provides solutions for A/V Integration, Home Theatre, Video Conference, Voice over IP, Video over IP, Encrypted KVM over IP, Design, Engineering, and the list goes on and on.

NuVision Technologies Inc. provides some of the best turn-key Audio and Visual Environments on the market today. NVT is not a product specific company giving us the edge to provide rock solid engineering without having to meet our product quota for the month from our suppliers. This allows us to provide a truly unbiased opinion to you with a guarantee of 100% satisfaction. The in-depth interview process requires NVT to listen to our client's A/V issues so we can provide to proper solution at an Affordable cost.

The ability to have Design, Engineering, and Implementation of equipment all under one roof is few and far between. NVT's goal was to provide all the services needed for a start to finish process for all of our customer's needs. NVT has provided services for projects as simple as a TV installation to A/V budgets over \$1,000,000. NVT's ability to meet the mark on every aspect of the installation makes it hard for our competitor's to match to performance one can get from us. Our expertise even flows into other aspects of the installation such as, HVAC requirements, electrical loads, and BTU's with thermal dissipation of A/V related equipment. Providing these expert services allows the customer to have a pleasant experience rather than the finding out this really isn't what they wanted.

NVT Clients include:

Government
Financial Institutions
Fortune 500
Education
Multi-Recreation
And YOU

Multi-display systems have long since been a quality of NVT. We provide A/V design and engineering for some of the most demanding Companies.

Sometimes the simple systems in life are the best engineered. Good engineering is only as good as it's installation NVT has the ability to make even the most complex systems look Easy!
